Claims 1, 2 and 3 lack novelty under PCT Article 33(2) as being anticipated by WOLK (U.S. Patent 5,551,695). See col. 6, lines 47-61 detailing the use of adhesive or double-sided tape.

Claims 1, 2, 15-18, 39, 64 and 71 lack novelty under PCT Article 33(2) as being anticipated by HONIG (U.S. Patent 5,362,058). Note col. 3, lines 28-55 and Figure 1 illustrating a "package" with attaching means and a connector means.

Claims 1, 2, 5, 8, 9, 19, 26, 28, 30, 31, 32, 33, 37, 39, 46-57, 64, 65, 67, 68, 69, 71, 78, 79, 80, 81, 98-100, 105, 106, 115, 116, 117, 118, 119, 121, 123, 127 and 134 lack novelty under PCT Article 33(2) as being anticipated by LANCELOTTO (U.S. Patent 4,135,720). See Figures 2, 8-12, 14, 17 and 18.

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

Claims 4, 21, 23, 25, 74-77 and 87 lack an inventive step under PCT Article 33(3) as being obvious over HONIG. Although the specific attachment means claimed (i.e., a screw, plurality of screws, nut, angled post, etc...) are not detailed by Honig, the skilled artisan would have found it obvious to modify the Honig device so that the alignment indicator would have been attachable to the rear of the club head using any suitable mechanical means. Note, Honig even indicates that other suitable means of attachment are acceptable. The claimed attachments means are simply deemed to be obvious mechanical variants over the arrangement shown in Honig.

Claims 36, 38, 102, 108, 109, 110 and 124-127 lack an inventive step under PCT Article 33(3) as being obvious over LANCELLOTTI. Specific to claim 36, the claimed dimensions are not deemed critical, as the size of the plate member used as an alignment means in Lancellotti would have depended upon the overall size of the club head. Specific to claim 38, the use of diverse color is simply viewed as an obvious design variant over the existing surface configuration of the Lancellotti wedge-shaped alignment device. Although the specific attachment means claimed are not detailed by Lancellotti, the skilled artisan would have found it obvious to modify the Lancellotti device so that the alignment indicator would have been attachable to the club head using any suitable mechanical means. The claimed attachments means are simply deemed to be obvious mechanical variants over the arrangement shown in Lancellotti.

Claims 1-135 meet the criteria set out in PCT Article 33(4), and thus claims 1-135 have industrial applicability because the subject matter claimed can be made or used in industry.

Claims 88-93, 101, 103, 104, 107 and 129-131 meet the criteria set out in PCT Article 33(2)-(3), because the prior art 1) does not teach or fairly suggest an attaching means wherein both a forward and rearward portion of the alignment device are attached to the blade and mallet portions, respectively, of the club head and 2) does not teach or fairly suggest the particular weight and thickness requirements.

NOTES TO FORM PCT/ISA/320

These Notes are intended to give the basic instructions concerning the filing of amendments under Article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the *PCT Applicant's Guide*, a publication of WIPO.

In these Notes, "Article," "Rule" and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions, respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international publication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Preliminary Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When? Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been/is filed, see below.

How? Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.
